

Soapstone **Available at Francini Inc.**

Soapstone is naturally durable making it an exceptional choice for just about any surface in your home. Its non-porous qualities make it heat and stain resistant as well as relatively low maintenance, which is ideal for countertops and sinks.

For use as a floor surface, soapstone is appealing because it does not get slippery when wet. It is even naturally warmer underfoot than other stones, a very appealing benefit for use in cold-weather areas.
